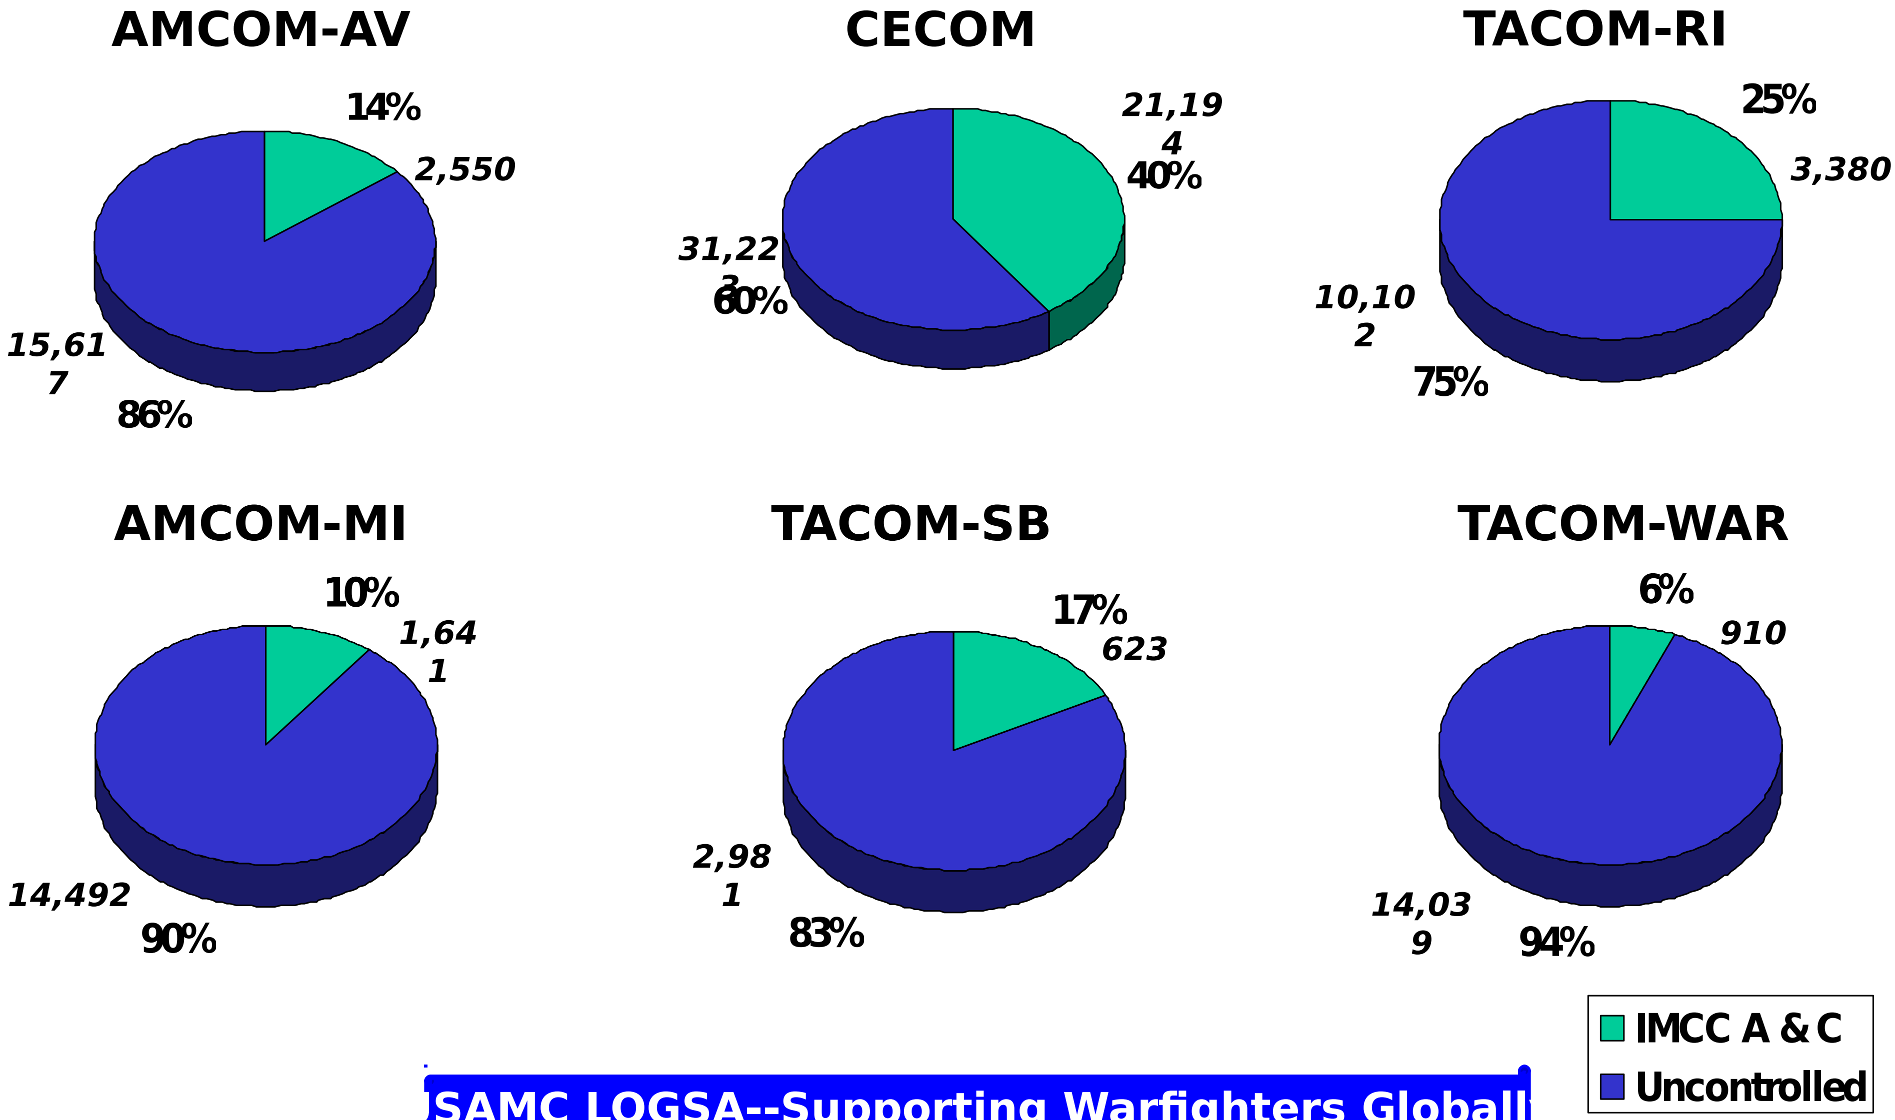
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Oct 05



Oct 05 data as of 8 Nov 05

Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,301	1,249
AMCOM-M	1,175	466
CECOM	20,148	1,046
TACOM-W	513	397
TACOM-R	1,603	1,777
TACOM-SB	501	122

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
